Safe Pedestrian Access to Belle Isle Circus

Belle Isle Circus is important to the local community both as a place to cross roads when walking North-South or East-West, and as a large green space with huge potential which has had big improvements in recent years.

As Belle Isle residents we are asking Leeds City Council to carry out a study of how to bring about safe pedestrian access to the Circus. This could include pedestrian crossings, traffic lights, traffic calming and a 20mph zone.

We ask Leeds to finish the study in time to include the outcomes in the 2026/27 budget.
